Git Commit Log Total — Week 06

1. General Information

- **Group ID:** Group02
- **Project Name:** Personal Finance Manager
- **Course:** CS160-26A01
- **Reporting Period:** 28/10/2026 – 13/11/2026
- **GitHub Repository:** https://github.com/thvy2507/CS160-Group02-FinalProject
- **Branch:** `main`

This document records the **cumulative Git commit history** reachable from `main` from project initialization through **13 November 2026**, including commits originally developed on feature branches and subsequently merged.

Counting rules: Commits are attributed to their GitHub author and dated in **Vietnam time (UTC+07:00)**. TV1's four GitHub PR merge commits and one local branch merge commit are included in TV1's count, but are identified separately from development commits to avoid implying duplicate implementation work. This is a commit-history count, not a measure of lines contributed.

Reconciliation with Week 05: The previously submitted Week 05 file listed four commits. The current verified history also contains commit `2bca733` on 06/11/2026, which was not listed there. All 34 commits are included here, without silently carrying forward the earlier undercount.

5. Pull Request & Integration Summary

PR	Owner	Feature Branch	Date Merged (UTC+07)	Scope
#6	TV1 — Vy	`feat/core-setup`	13/11/2026	Core DynamicArray, Date and unit tests
#7	TV2 — Khôi	`feat/master-data-models`	13/11/2026	Master Data models and manager interfaces
#8	TV3 — Uyên	`feat/transaction-models`	13/11/2026	Transaction and recurring interfaces
#5	TV4 — Tân	`feat/statistics-design`	13/11/2026	Statistics/Dashboard skeleton, tests, docs and CMake integration

All four PRs were merged into `main` on 13/11/2026. TV1 performed integration reviews and additional commits on the relevant feature branches before merging.
